

**We have reason for great HOPE for the future.**

**We have the children of our world.**

In spite of the toxic planet we give them to inherit,

the old paradigms which no longer work,

the educational system which does not support their growth,

the dis-empowered parenting we have been raising them with,

the weakened, diseased bodies they have been born into,

and the lack of proper nourishment since then,

etc.

etc.

etc.

**THEY CAN AND WILL RISE TO THE OCCASION  
AND LEAD US TO A NEW WORLD.**

Again,

**We have great reason to HOPE for the future.**
